Always a new business is welcome. But Careers USA is special because it is a woman's business! And ~~it~~ <sup>sometimes it</sup> takes a woman behind that wheel barrow to get the job done. Only in America do people of all backgrounds have the opportunity to own and operate their own business. Only in America does the free enterprise system truly blossom for the benefit of all.

As we christen - Careers. USA. Let us celebrate the promises that our nation's founding fathers gave us. We can be thankful we live in a country where privately owned businesses are permitted. We can be thankful that all individuals, regardless of race, religion or sex can pursue the unique + special <sup>Good</sup> ~~dream~~ of owning a business - <sup>luck</sup> ~~some~~ <sub>DREAM</sub>

6 pm - 100 E G-1

I was very pleased when Jane Richardson  
asked me to be a part of the grand opening of  
Careers, USA. - So we gather to christen a new  
business - a business whose commitment will be  
to put people to work.

Jane should do well in Chester County  
because business and industry is still moving into  
Chester County. And hand in hand with business is the  
need to employ skilled people. So Jane may become  
Chester County's Match-maker.

There's a saying that goes - "Business is like  
a wheelbarrow - it stands still unless some body pushes  
it. And that's where Careers USA comes in because  
it talks people to push wheelbarrows."
